NOTE

L'eventuale presenza di "puntature", simili a bolle d'aria, all'interno del vetro non è da ritenersi difetto di lavorazione, ma caratteristiche intrinseche del processo di fusione e modellazione del vetro eseguito interamente a mano.

Whenever an internal "dotted effect", such as air bubbles, occurs on the cast glass, this shall not be considered as a manufacturing flaw but a inherent proof of craftsmanship due to the entirely handmade glass fusion and shaping process.
